

TRUST POLICY CRITICISED BY THE MINORITY

Debating Plan Derided
"Beneficent Sunshine,"
Enhancing Stock of
Corporations.

WASHINGTON, Jan. 29.—"Beneficent Sunshine," enhancing the stock of corporations, was a characterization of the trust policy of the Democratic administration by Republicans during debate in the senate. Policy of amicable agreements with corporations also was criticised by minority speakers.

At the hearings on the pending anti-trust bill, under way before the judiciary committee, Senator Cummins introduced a resolution to the effect that there should be no amicable agreement with corporations, and that such a trust probably did not exist.

Senator Cummins introduced a resolution to the effect that there should be no amicable agreement with corporations, and that such a trust probably did not exist.

GIRL SAVES FROM AWFUL WRECK

Dam Bursts Near Greeley,
Colo.; Burlington Railway
Bridge Washed Out.

GREELEY, Colo., Jan. 29.—Damage estimated tonight at nearly \$200,000 was done by the breaking of the dam at the Horse creek reservoir early this morning, sending a flood of water over the flats, inundating a strip of land ten miles long by three miles wide, and a torrent down Box Elder creek.

The flood, which for a mile ran a swift current ten feet deep, washed out the Burlington railway bridge, and destroyed approximately 250 head of cattle.

The quick action of Dora Shaffer, the 18-year-old daughter of Frederick M. Shaffer, living a mile from the dam, saved a Chicago, Burlington & Quincy west-bound train from plunging through a weakened bridge into Box Elder creek, where the flood was at its worst.

At daylight when the Shaffer family was aroused by the rush of the water, burdened with ice and cattle, past the house, Mrs. Shaffer remembered the west-bound Burlington train was about due and knew the bridge across the Box Elder creek could not hold.

She telephoned to Hudson urging that the train be flagged.

Miss Addie Gannon, night operator at the Hudson telephone exchange, picked up the call and notified Keeney, where the train was held.

It was said tonight that concrete weakening near the conduit seeped water into the filling of the main wall, which crumpled until a crevice 300 feet wide developed.

Representative Henry of Texas presented his views today in the form of a letter embodying a speech he made in North Carolina recently.

Representative Sims of Tennessee, who will be active in the work of framing the proposed anti-trust bill, has a measure now on the committee which will figure materially in the discussions. It would make it unlawful for railroad to issue capital stock, stock certificates, bonds or any other evidence of indebtedness except with the approval of the interstate commerce commission.

Stanley's Argument.

First public hearings on the new trust bill were begun today before the judiciary committee. The bill defining restraints of trade, prohibited by the Sherman law, was taken up.

Representative Stanley, who has introduced a bill making every restraint of trade, whether "reasonable or unreasonable," a violation of law, made a long argument for clearing up the twilight zone.

He contended that prior to the Standard Oil and Tobacco cases the supreme court had repeatedly held that it was outside of its province to determine whether a restraint was "due or undue, reasonable or unreasonable," and declared that in these same cases, "the reasonable and unreasonable" features of the decisions were merely incidental.

"The only act that can be effective," said Stanley, "is an absolute prohibition of all restraints of trade. For it is beyond the power of any court to take up and determine the question of fact as to whether a restraint is reasonable or unreasonable."

The committee arranged to hear Seth Low of New York next Wednesday.

Mapes Presents Bill.

Another bill to empower the interstate commerce commission to regulate issues of railroad securities was introduced today in the house. Representative Mapes presented a measure modeled after the Michigan law. Securities maturing within two years would be exempt from its provisions.

GOETHALS WILL BE GOVERNOR OF ZONE

Assures War Secretary He
Will Not Retire if His
Services Are Needed.

NAME SENT TO SENATE
Will Not Suffer Loss in Salary
if Britton Bill Passes
Congress.

By International News Service.
WASHINGTON, Jan. 29.—Colonel George W. Goethals today unconditionally accepted President Wilson's offer of the first governorship of the Panama canal zone.

Replying to a query sent by Secretary of War Garrison, asking whether he desired to remain in the service, Colonel Goethals sent this message:

"Referring to your cable of January 27 relative to governorship, will not retire so long as my services are needed."

As soon as the war department received this message President Wilson was notified, and he sent Colonel Goethals's nomination to the senate later in the day. Confirmation of the appointment is expected this week.

Meanwhile congress proposes that the colonel shall not suffer the loss of \$5000 in salary which will occur if he becomes governor at \$10,000 a year. Representative Britton of Chicago today introduced in the house a bill amending the Panama canal law so that Colonel Goethals might receive an additional \$5000. His amendment would apply to no other governor.

Accepted as Final.

The terse reply sent to Secretary Garrison by Colonel Goethals was unconditionally accepted as a final announcement that he will not leave his post at Panama either to become police commissioner of New York or director in the proposed government railway in Alaska.

To certain are senators of this that those who have been persistently demanding that Colonel Goethals take charge of the Alaskan project today admitted that they would not press their claims when the Panama canal bill's case came up for confirmation.

Secretary Garrison's telegram of inquiry read as follows:

"In connection with the president's intention to appoint you governor, may I assure him that you do not desire to retire from service as long as your services are needed?"

Goethals's reply, quoted above, is reported to be equivalent to a refusal of both the New York and Alaska propositions.

Will Organize Force.

The formidable task of making up a permanent roll of employees to operate the canal and to discharge the manifold duties probably will fall directly upon Colonel Goethals. Secretary Garrison is inclined to believe that under the terms of the Adamson act he himself technically must make the appointments, though he may delegate the duty to the governor of the Panama canal.

Colonel Goethals is said to have desired the appointment as first governor of the canal in order that he might himself organize the permanent operating force with the men who helped him to construct the canal and of whose abilities he had personal knowledge. He will have to select something like 2500 permanent employees, to be selected from about three times that number.

Mitchell Has Hopes.

NEW YORK, Jan. 29.—Mayor John Purroy Mitchell sent the five Goethals policy bills to Albany today, where they will be introduced in the state legislature.

MICHIGAN UNIONS LEVY ASSESSMENT

Seventy Thousand Men and
Women to Aid the Copper
Miners on Strike.

GRAND JURY ADJOURNS
Congressional Subcommittee
Expected to Leave for the
West Next Week.

LANSING, Mich., Jan. 29.—After a series of sharp, bitter skirmishes over resolutions which kept the conference in a turmoil delegates representing every labor union of Michigan, in session today, imposed a weekly assessment of from 5 to 50 cents upon every employed union man and woman in the state, to provide a fund for the assistance of miners who are on strike in the Calumet copper region.

The resolution allows each person affected to contribute a weekly amount which he feels he can afford. The assessment will be levied on about 70,000 persons, according to Claude O. Taylor, president of the state Federation of Labor.

A resolution urging the American Federation of Labor to call a national strike in sympathy with the Calumet miners was supported on the floor of the conference only by members of local unions of the United Mine Workers of America. Other mine workers opposed the resolution, which was also opposed by the resolutions committee. It finally was tabled.

Governor Criticized.

Almost all of the resolutions considered by the conference resulted in criticism of the state militia and the manner in which Governor Ferris conducted his investigation of the Calumet strike.

Daniel C. Kelley of Grand Rapids, who represented the International Typographical union, declared Governor Ferris could have settled the strike had he gone to Calumet and investigated after the miners quit work.

"Instead, he sent militiamen there, for what reason I do not know," said Kelley.

After Kelley spoke the conference referred to the executive committee of the state Federation of Labor resolutions favoring a tonnage tax upon ore and the passage of a law placing the expense of militia maintenance upon the county into which the National Guardsmen are ordered for service.

Resolution Tabled.

A resolution urging government ownership of the copper mines of the United States was tabled.

The conference tried unsuccessfully to obtain a statement from Governor Ferris discussing his recent investigation in the copper country.

Before the conference adjourned tonight it empowered the executive committee of the Michigan Federation of Labor to urge the governor immediately to make public the Calumet situation as he views it.

The approaching investigation of the Upper Peninsula trouble by a congressional committee received only casual comment from the delegates.

The conference, however, praised Representative McDonald of Michigan for his efforts to procure an investigation.

Grand Jury Quits.

HOUGHTON, Mich., Jan. 29.—After devoting two days to an investigation of the Painesdale murders, in which three non-union men were killed, the special grand jury which has been inquiring into disorders growing out of the copper mine strike was discharged today from further service. A. F. Heidkamp, the foreman, announced to the court that the body had no further report to make.

RURAL CREDIT BILLS BEFORE CONGRESS

Measures Introduced Simul-
taneously in Senate and
House.

OTHERS COME LATER
Subcommittee May Visit
Agricultural Centers to
Study the Conditions.

WASHINGTON, Jan. 29.—Administration rural credit bills were introduced simultaneously in the senate and house today by Senator Fletcher of Florida and Representative Moss of Indiana, members of the committee President Wilson sent abroad last summer to study the foreign systems.

The bills today were for long term farm loans. Bills for short term loans will be introduced later. The introduction was a sequel to yesterday's conference at the White house.

Today's measures would establish in the treasury department a bureau of farm land banks under the direction of a commissioner, and make provision for the formation of such banks in any state under federal charter and federal inspection.

Power to Issue Bonds.

Any group of farmers within a state might organize co-operative farm land banks with power to issue bonds to raise funds from distant money markets for farm development. Operations of the individual banks would be confined within state lines, though supervision will be federal, owing to the variety of state laws bearing on land titles, taxation, foreclosures and like subjects. They would be strictly prohibited from doing a city business.

Loans to farmers might not exceed fifty per cent of the value of improved land, nor extend more than thirty-five years. No institution could begin business without a foundation capital and double liability provided for national banks. The amount of long term business which might be undertaken by any of the proposed banks could not exceed fifteen times the amount of paid-up share capital and surplus. They might accept any pay interests on deposits not exceeding fifty per cent of capital and surplus and receive deposits of postal savings funds to the same extent.

Report Submitted.

The report submitted with the bill was drafted by Senator Fletcher, chairman; Senator Gore, Representative Moss of Indiana, Dr. John Lee Coulter of Minnesota, representing the census bureau and other members of the rural credit commission.

The bills were referred to the banking and currency committee of the senate and house, which have subcommittees assigned to the subject. Representative Buldick of Ohio, chairman of the house subcommittee, and Majority Leader Underwood, plan to see the bills this week to fix a place for the measures on the legislative programme of the present session. If the president does not want them advanced too early on the calendar the subcommittee would like to visit agricultural centers throughout the country and study conditions to which a rural bank bill would apply.

Senators Owen, Hollis and Crawford, comprising the senate subcommittee also are at work on the proposed legislation and are co-operating with the house committee, which already has held several hearings.

The bill introduced today is not necessarily the last word on the subject, being merely the suggestions of the special committee headed by Senator Fletcher.

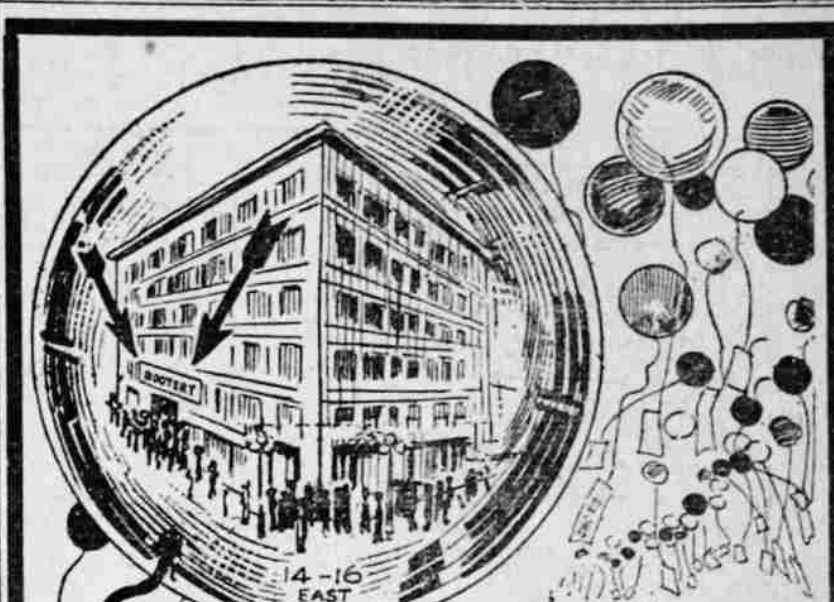

China Adopts Its
Ancient Religion

(Continued from Page One.)

retain confidence in repeated assurances the president has given of his friendliness toward the Christian religion. Recent letters received at headquarters here from Christian workers in the Chinese field made known this belief.

Yuan Concerned.

"I think," said Dr. F. M. North, secretary of the board of foreign missions of the Methodist Episcopal church in charge of the Chinese field, "that President Yuan Shi Kai is concerned that there shall not come to China a period of irreligion. Our missionaries who know him say he believes it is essential that his country shall not lose its ethical strength."

will hamper the work of our mission-
aries there. It would be a backward
step in the progress of China, for it
would permit the spread and un-
scrupulous mix religion with business
and politics."

Evidence of Reaction.

Missionary workers here recalled that the Chinese provisional constitution mandated religious freedom, and they agreed that today's move by the administrative council, which Yuan Shi Kai, they hear, practically discredited reactionary tendencies. In a recent report to the state department the American charge d'affaires at Peking took this same view. He pointed out that the revolution which established the republic discredited Confucianism because it was associated with the old order. At that time Confucian temples were destroyed or turned to secular uses.

Foremost in the movement to reform Confucianism was Dr. Chen Huan-Chang, who has the degree of doctor of philosophy from Columbia university. He is remembered here as one of the study Chinese who ever attended Columbia and his influence in China has been marked. At the head of a company of Chinese scholars he did his best to have the Chinese field, "that President Yuan Shi Kai is concerned that there shall not come to China a period of irreligion. Our missionaries who know him say he believes it is essential that his country shall not lose its ethical strength."

It is to be regretted that the question of religion in China has not remained open; but we have no doubt of the president's friendliness. He has said the ethics of Christianity are essential to the Chinese republic and his nieces are now being educated in one of our schools in Peking. This does not mean that they have embraced Christianity, but it is a sign of Yuan Shi Kai's good will and his recognition of the value of our missions.

Dr. North received a letter today from James W. Bashford, Methodist bishop of China, which made no reference to the Confucianist movement. He considered this omission evidence that the situation was causing Bishop Bashford no alarm.

Will Not Interfere.

Edward Lincoln Smith, corresponding secretary of the American board of commissioners for foreign missions of the Congregational church, agreed in a measure with Dr. North.

"I look to me," he said, "like an effort on Yuan Shi Kai's part to conserve the old religion. I do not believe he will interfere with our work. We have just had proof of Chinese friendliness in a request from the government of Szechuan, an interior province, that our mission there take charge of the public school system in a large section of the province."

On behalf of the board of foreign missions of the Presbyterian church, Dr. A. Woodruff Halsey, secretary of the home department of that organization, said today:

"We are opposing the move toward Confucianism for the good of China herself rather than because we believe it

The \$35
American Adder

Try It 10 Days

Since last June over 12,000 offices have adopted this Adder.
Each took the machine on trial. Each made a ten-day test.

They found the machine to be rapid and competent. Even a child can operate it. And anyone, with little practice, can compute a hundred figures a minute.

It does all that is done by \$150 machines, and it never makes mistakes.

Every office, store and factory needs this American Adder. None will go without it after knowing what it does.

Ask us to send one on ten days' free trial. It incurs no obligation. Learn what it means to you. Telephone us now.
